

Voice Reader Studio

Sales arguments

- The **cost-effective alternative** to a recording studio
- Natural sounding **speech output** to read out texts in **15 languages**
- **Professional export** of sound files as MP3 or WAV

Outstanding sound quality

- Unique **TTS technology** (Text-To-Speech) for excellent, natural speech output
- Various settings for easy **script control** including pauses
- Inserting **sound effects**, i.e. applause or original soundtrack
- **Three animated speakers** can be shown. Choose your favourite one: Julia, Lara, or maybe Marc (only British English)?

User scenarios

- **Present** your PowerPoint slides, Flash demos or company videos with audio voice over
- Provide your **website content** in audio form
- Ideal as a cost-effective **advertising platform**
- Create your own **audio book** or podcast
- Record **teaching and learning materials** – as the study carried out by the University of Regensburg, Germany confirms absorption by listening is 29% greater than just reading.
- In short, **any announcement** for a broader audience can be converted into an audio file by a single click.

Technical details for professional use

- **Adjustable options** for volume, pitch, speed, and echo
- Editor to **improve pronunciation** of unusual words or names
- Sound quality settings between **32 bps and 128 bps**
- Optimised for **Microsoft Windows Vista®** and **Office 2007**
